

LINED VALVE COMPANY, INC.

FIGURE 53 DUCTILE IRON KNIFE GATE VALVE

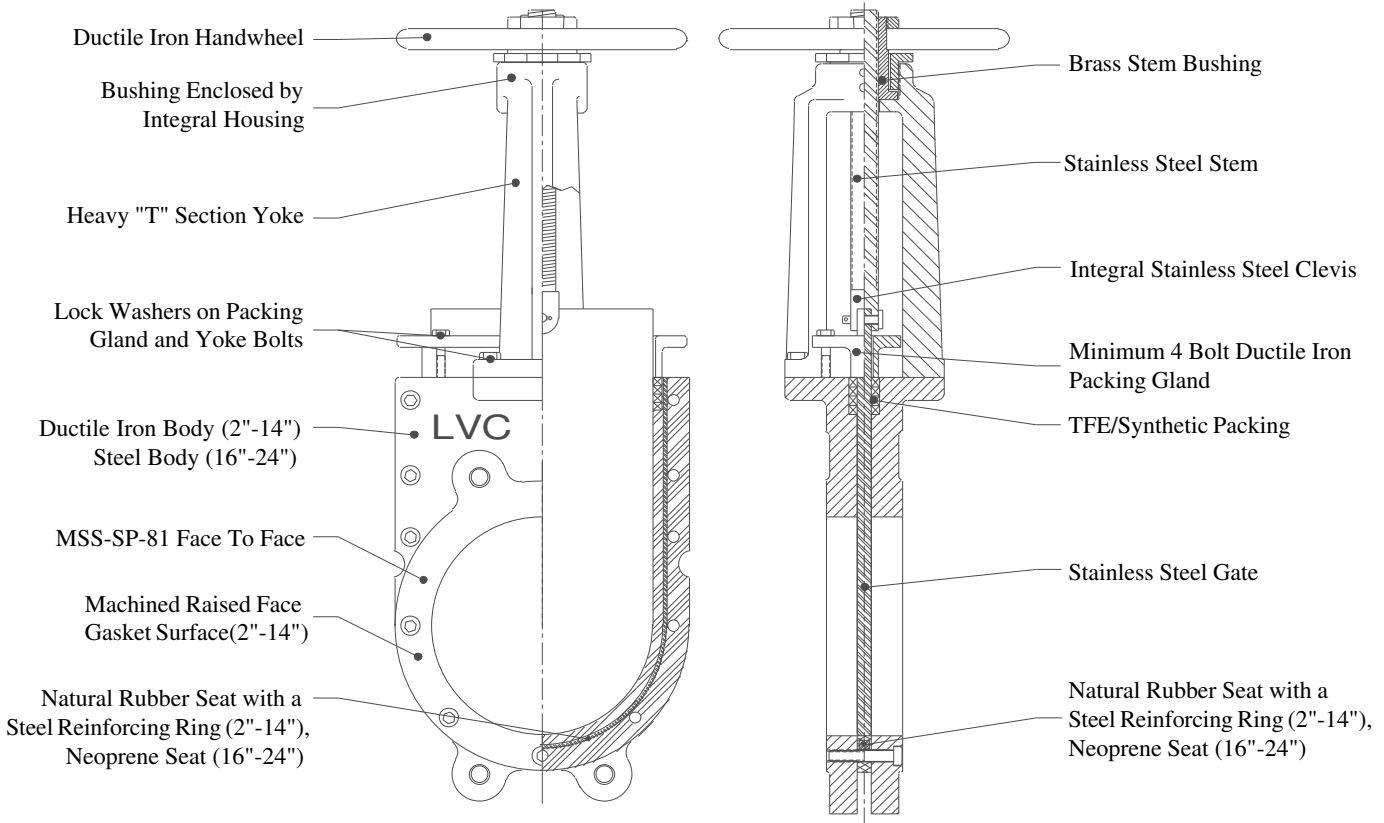

FEATURES

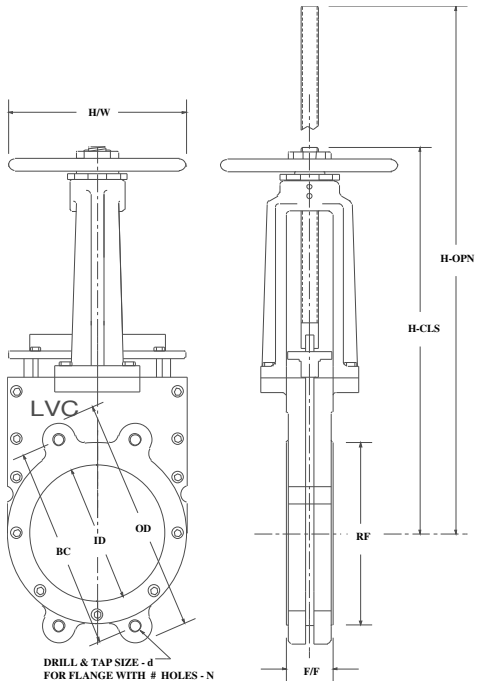

- **HEAVY DUTY** cast ductile iron body and yoke for the most rugged service.
 - Through bolting on side flange bolts to allow easy installation.
 - Replaceable natural rubber seat provides a **BI-DIRECTIONAL BUBBLE TIGHT SEAL** across gate from 0 to 150 PSI.
 - Rubber seat is flush with the bottom of the port **ELIMINATING** any pockets in the bottom of the Valve to collect material in media such as slurries, pellets or powders.
 - Rubber seat has a **molded-in steel reinforcement** and is bolted in place to prevent it from being shifted out of position by gate movement.
 - Rubber seat replacement is quick and easy.
 - Machined stainless steel gate for corrosion resistance and durability.
 - Stainless steel stem for corrosion resistance.
 - Easy conversion from handwheel operator to cylinder, bevel gear or electric motor operator using cast yoke.
 - Enclosed **brass stem bushing** provides reduced operating torque and protection of the stem bushing from harsh environments.
 - Full packing seal around gate to prevent packing leakage.
 - **MSS-SP-81** face to face dimension and flange dimensions.
 - **Full port ID.**
 - Minimum 4 bolt packing gland to assure proper gland alignment in all valve sizes.
 - All ductile iron surfaces (**interior & exterior**) are coated with a **epoxy powder coating** for long lasting corrosion resistance.
-
